Earthquake Detectors

6" high x 3" wide x 1-1/4" deep

- Provides early warning by detecting an Earthquake's sound wave before the earthquake's destructive shear wave strikes
- Fully adjustable sensitivity setting
- Automatically resets and shuts off alarm when earthquake stops
- Mounts easily to wall – no screws, nails or tools required
- Operates off a 9-volt battery
- Loud distinctive alarm to wake you up
- Monitors aftershock
- Offers peace of mind and keeps you informed
- Can detect earthquakes that occur many miles away
- Patented reverse pendulum detection system
