MISSION SUPPLIES

SERVICE WITHOUT BOUNDARIES

#SocialDistancing

Another great solution from  
Diplomatic Mission Supplies

Following on from the recent outbreak of COVID-19 Pandemic, which has left the whole world facing the unknown, Diplomatic Mission Supplies has taken immediate action to ensure a normal working life can be continued as soon as possible. Therefore, we are delighted to be able to offer a new product called HealthGuard. We also have a number of other products that are available to help maintain Social Distancing and the wellbeing of all our clients.

## **HealthGuard**

### **What is Health Guard?**

Health Guard is a range of protective screens which have been professionally designed as a direct result of COVID-19. The objective is to develop a range of products for use in various workplace environments to offer enhanced comfort, safety and protection for frontline staff and customers. The system works by placing a clear plastic protective barrier between people. We offer a wide range of applications, from counter screens to protective units for desk tops and table top environments.

### **Product Benefits:-**

- Clear transparent barrier maintains clear visibility and communication between staff
- There is no need for expensive site installation, all units are flat packed for easy 'tool-free' assembly on site. Our designs are sturdy and free standing which simply sit on your existing countertop
- If required, the units can easily be fixed to counter tops using double sided tape or wood screws
- High impact plastics are used for the top screen; we offer polycarbonate as standard due to it's high impact resistance, or alternatively PETG plastic, again which has a high impact resistance, 5mm materials is as standard
- Vinyl Graphic is included with each unit, this can be designed and branded to the requirements of Post, I.e. each department name or section etc.
- Variety of options included on the timber base, from white to colours of woodgrain finishes
- Healthguard is a broad product range and not limited to one application. We offer a range of sizes and units, as well as a complete bespoke design and manufacture to the specific client requirements if desired

## **Health Guard Standard**

Health Guard Standard is a counter top solution, where staff will stand to interact with one another. The unit dimensions are 600mm wide x 900mm high x 300mm deep. This is ideal for any meeting area or for any general social area. The unit simply sits onto an existing counter and therefore, no expensive installation is required so there is no alteration required for your existing counter. This can simply be packed away when not needed and stored for future use.

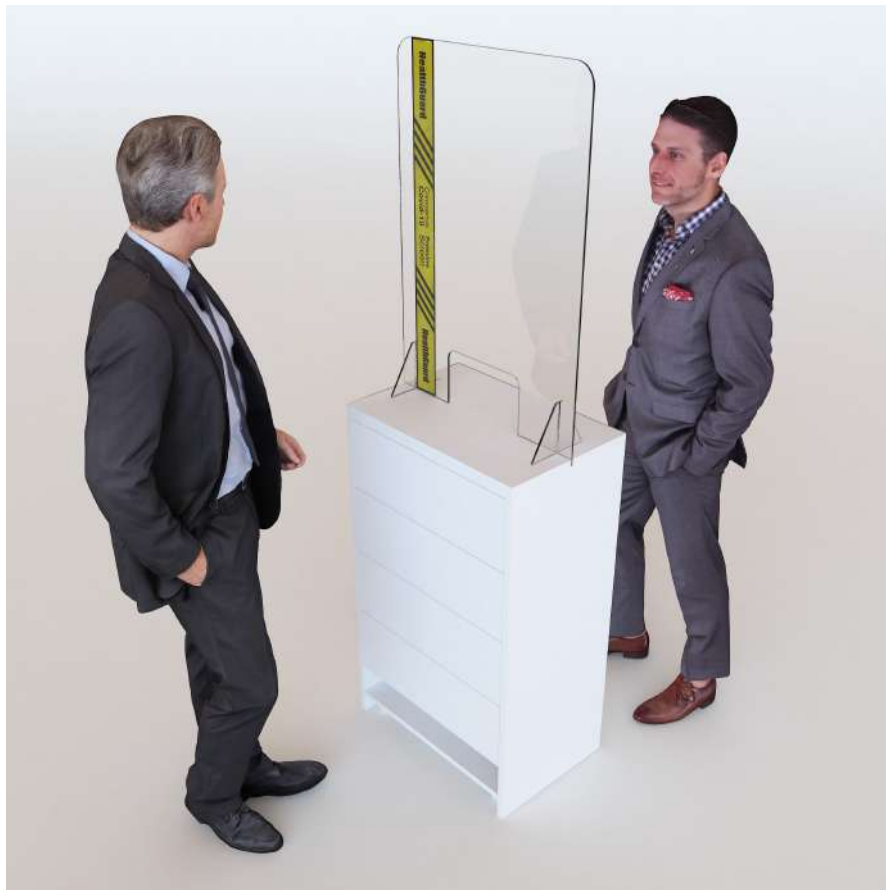

## **Health Guard Mobile**

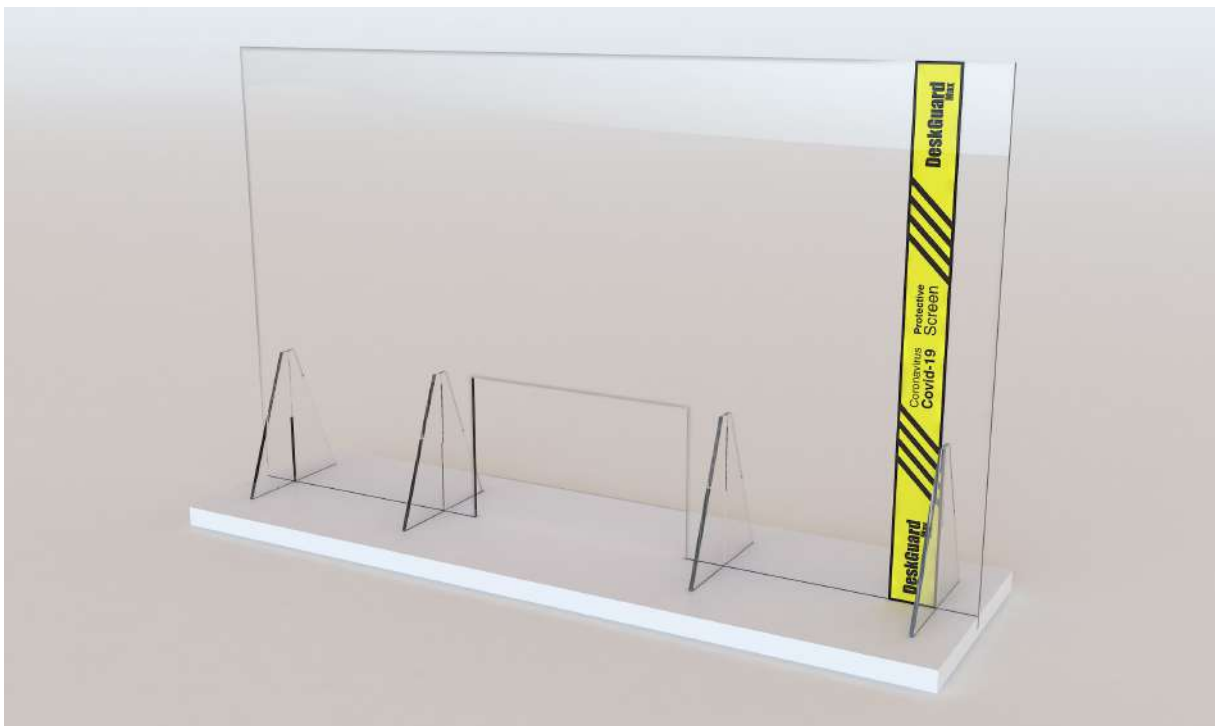

Health Guard Mobile is a mobile floor solution which consists of a Health Guard Standard screen fixed onto a mobile base storage unit which has 4 separate pull out drawers and is on castors. Ideal Doorway service solution or temporary service area solution. The dimensions are: 600mm wide x 400mm deep x 1882mm overall height (1000mm to the counter top).

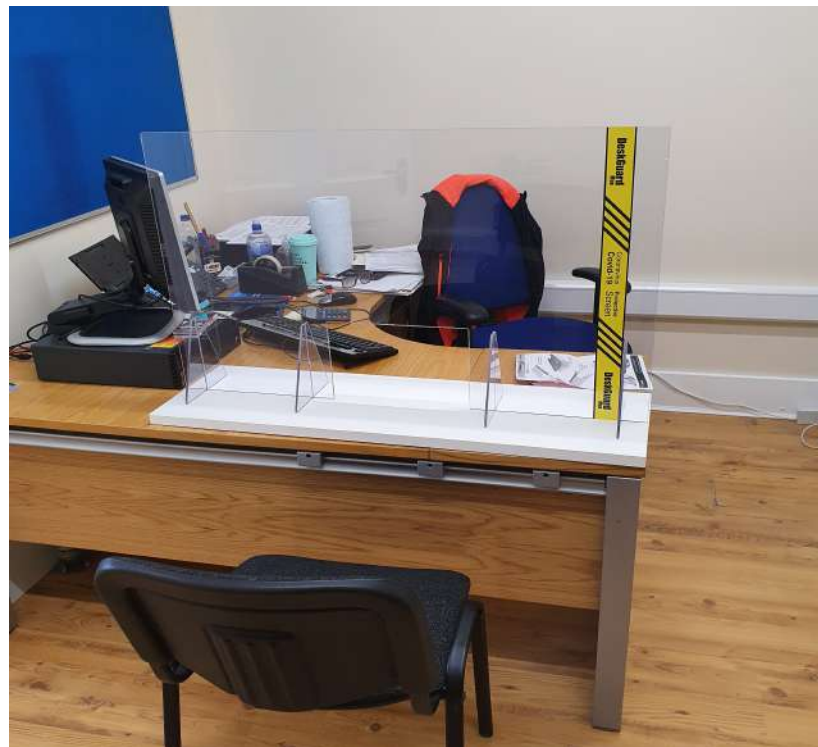

## **Desk Guard**

The Desk Guard is a desktop solution for those staff who sit behind a counter to interact with others, ideally this is made for reception areas. They are also perfect for use on a standard desk to ensure safe distancing can be kept to an optimal. The units are flat packed for easy assemble, no installation is needed and there is no need to interfere with the workspace. Standard units have a 300mm base and are 600mm high, although 900mm height is available on request. They are also available as 600mm or 800mm wide.

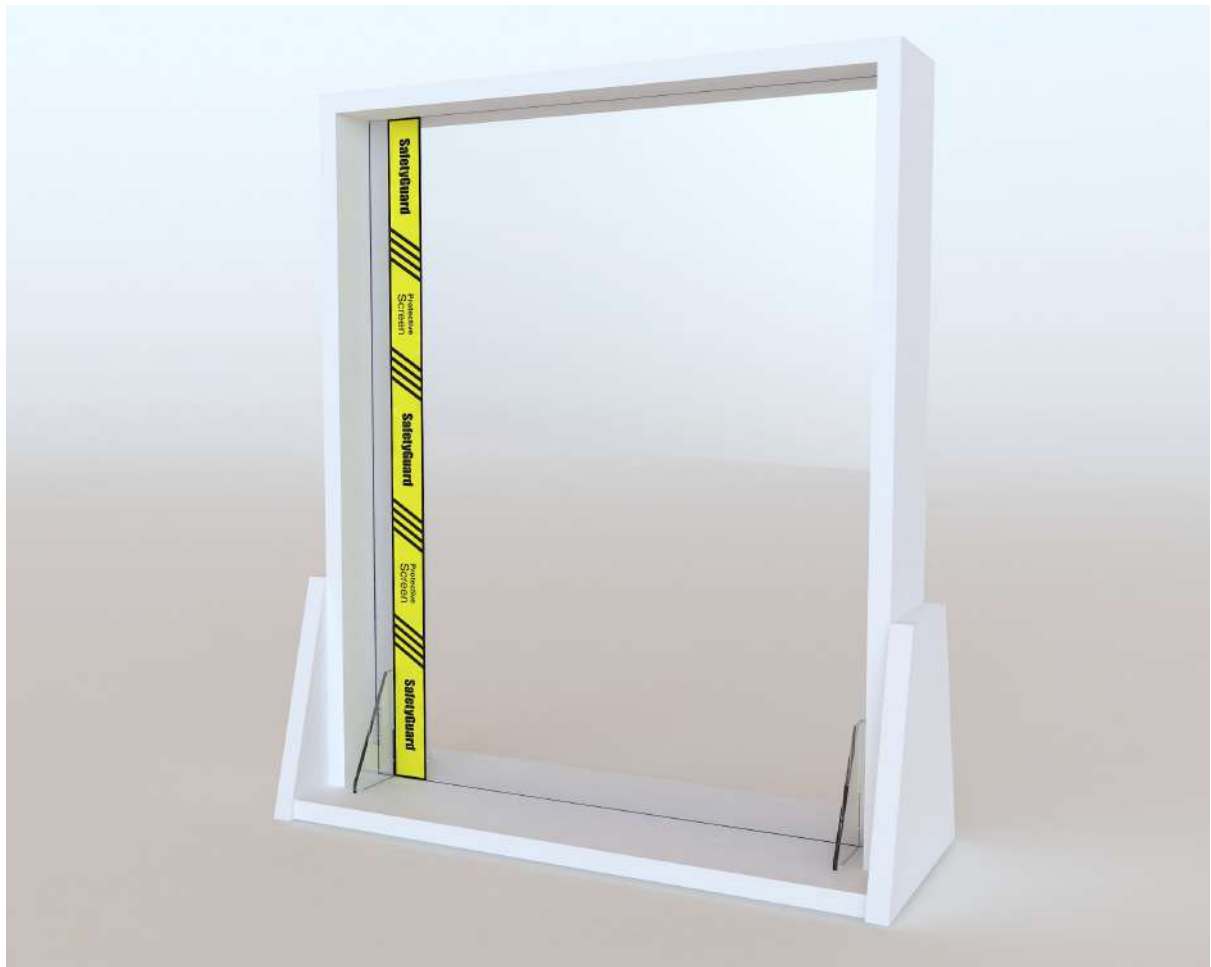

## **Desk Guard MAX**

The Desk Guard Max is another desktop solution, with an extra strong unit with 4 base supports. The max is 1000mm wide, which is ideal for wider counter areas. The standard units have a 300mm base and a 600mm/ 900mm height. Like the Desk Guard, the units are flat packed for easy assemble, no installation is needed and there is no need to interfere with the work space.

## **Safe Guard**

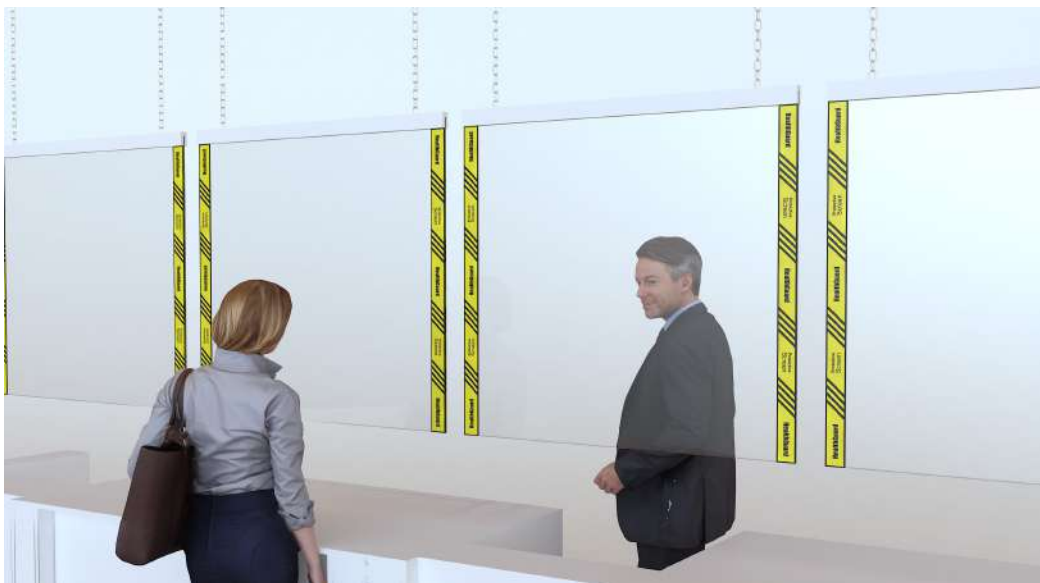

The Safe Guard is the ultimate damage proof screen protection, designed for one to one meetings or for any one to one interview room situations. This is an extremely strong solution, designed to safeguard staff, the unit has a 25mm timber frame all around, with polycarbonate plastic set into the frame. The structure is further strengthened by the use of 2 outside cleats giving added stability and impact resistant. The base unit is pre-drilled for counter fixing, the bolts and fixings are included. Dimensions are 790mm wide x 900mm high and 300mm deep. Other sizes are also available upon request. The units do come assembled, but installation is required to securely fix the worktop.

## **CounterFree**

The Counter Free screen is fixed to a top timber support and then individual large plastic panels hang down from strong steel chains, which are supplied with the product. The plastic is polycarbonate and each screen is 1000mm x 1000mm. Different timber finishes are available upon request. This solution is ideal where the counter space is limited.

## **CounterTop**

The Counter Top is a high-end premium protective panel that is fitted to your existing counter with the 6 chrome fixing ports. Installation is required on this range but is an ideal solution for higher end reception areas. The polycarbonate is 1000mm x 1000mm, again this is ideal where counter space is limited.
