DIPLOMATIC
MISSION SUPPLIES

Foreword by our Founder and Director Graham R Taylor...

For more than twenty years, **Diplomatic Mission Supplies** has established itself as one of the most trusted and reliable sources of **Procurement & Logistics** specialists to the FCO; British Posts; DFID; BCG and MOD worldwide.

Over the past decade we have specialized in furniture housepacks including sofa sets and mattresses; we are proud to supply through the **FCO contract CPG1512** ensuring we adhere to strict methods of production including timber from sustainable sources; using only **CMHR** foam and mattresses to **British Standard Crib 5**.

Health & Safety issues are constantly referred to as 'in house' as we constantly strive to offer unrivaled support to overseas Missions as we endeavor to source all manner of products that do not compromise our environmental beliefs, working with manufacturers and shippers that support 'green' issues worldwide to reduce our Carbon Footprint, including recycled packaging whenever possible.

During this time, we have built up an enviable reputation for first class service delivering superb products at value for money prices for our loyal and expanding customer base. We have excellent trading relationships with our carefully chosen business partners enabling us to meet or exceed customer expectations and this new range of handmade sofa sets reflects the superb quality synonymous with our name... **Diplomatic Mission Supplies**

We have made countless complimentary visits overseas to our clients to ensure we understand the individual needs of each customer per region so we can work together as a team committed to serving **HM Government**, providing the very best of British manufacturing whenever possible, after all, **Britain is Great!**

Please visit our website dms-uk.com for further information on our vast range of products and services we offer as we strive to offer '**Service Without Boundaries**'!

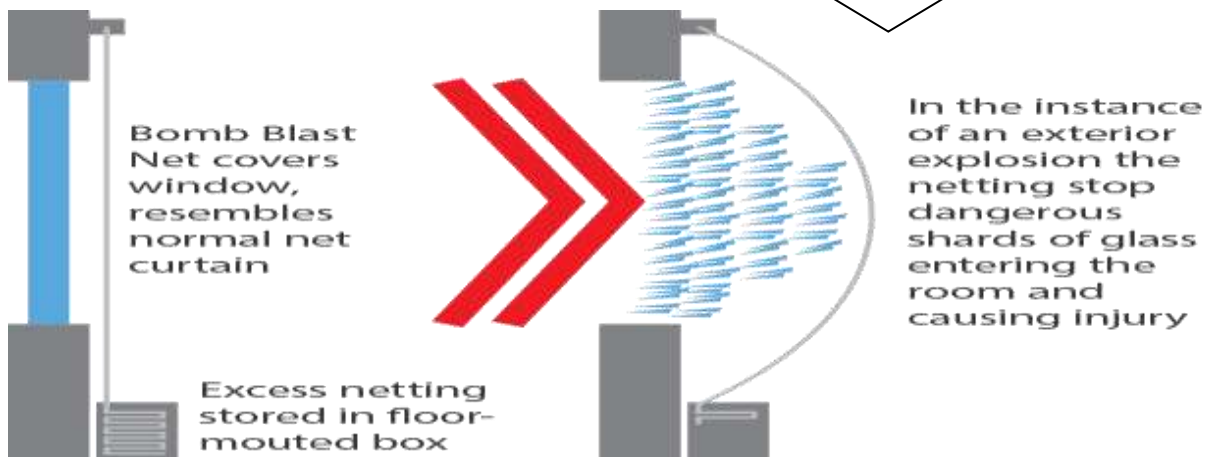

CCTV and Security Systems

Keep track of what is happening on your Post's premises with CCTV Monitoring Equipment, Remote Bollards and Under Vehicle Mirrors.

Bomb Blast Film can provide added protection to windows. Blastproof and Bulletproof glass is also available for buildings and vehicles.

Tyre Killers

Effective traffic control ensures rogue vehicles will be rendered unusable.

We can offer different types of tyre killers to meet your requirements.

Posts may decide on standalone tyre units or an automatic barrier which is mechanically linked to a spiked tyre killer.

Safety Exteriors

Palisade, Electric and Vibration Detection are just some of the types of fencing we can supply to ensure the safety and security of your Post.

Anti-Climb Spinners will make sure that no one can scale fencing, walls and buildings. These cannot be twisted and do not rust.

Gates can be built to designed to any requirement, whether it be folding gates, sliding gates or swing gates.

DIPLOMATIC
MISSION SUPPLIES

Lighting and Access Control

LED floodlighting can illuminate large areas and is more energy efficient than high-consumption traditional floodlights.

LED lifespan is also significantly longer than traditional floodlights.

All units are available with white light, visible infra red or covert infra red LEDs.

From single entrance standard access control to voice recognition and biometric systems, we are able to offer an access control point to meet your individual requirements.

We can also offer intruder detection systems for doors, walls and outside perimeters.

Earthquake Detectors

6" high x 3" wide x 1-1/4" deep

- Provides early warning by detecting an Earthquake's sound wave before the earthquake's destructive shear wave strikes
- Fully adjustable sensitivity setting
- Automatically resets and shuts off alarm when earthquake stops
- Mounts easily to wall – no screws, nails or tools required
- Operates off a 9-volt battery
- Loud distinctive alarm to wake you up
- Monitors aftershock
- Offers peace of mind and keeps you informed
- Can detect earthquakes that occur many miles away
- Patented reverse pendulum detection system

Face Masks

- The best British Technology and design.
- Great for urban residents, Technical Works, Gardeners and Outdoor workers.
- Ideal for Diplomatic Posts with high air pollution levels
- Military Grade Filtration Technology
- Nearly 100% protection from Particulate Pollution.
- Meets N99 Standard of Particulate Filtration.
- Face Masks come in five different sizes.
- Provides protection against pollution, bacteria and viruses.
- Suitable for adults and children.

Cambridge Mask are respirators that use Military Grade Filtration Technology to filter out nearly 100% of particulate pollution, gases, as well as bacteria and viruses in a fashion friendly mask suitable for Technical Works team, Gardeners, Outdoor Workers.

Crisis Essentials

Emergency Blankets in various sizes and colours.

Emergency Tents in various sizes and colours.

Foil Blankets for emergency insulation – helps prevent hypothermia.

Ration Packs

Freeze Dried Ration Pack

What are the unique advantages of freeze drying over other food preservation methods?

Frozen foods maintain fresh flavour - but they must be kept frozen.

Dehydrated and canned foods are shelf stable - but processing at high temperatures reduces their flavour, texture, colour, and nutrients.

Freeze drying combines the best of these processing methods, using today's science and technology to lock in the flavour, nutrient content, colour, texture, and aroma of food while providing shelf-stable convenience. With Freeze Dried Meals it's easy to cook up a delicious meal in minutes wherever you go!

What are the unique benefits of freeze dried food?

Appearance - Freeze dried foods maintain their original shape and texture, unlike air dried foods which shrink and shrivel due to high temperature processing. Just add water and in minutes the food rehydrates to its original form.

Taste - Tastes as good as fresh. Freeze drying removes the water, not the flavour. So freeze dried foods retain virtually all their fresh food taste, vitamins and nutritional content.

Weight - Weighs less than fresh. Freeze dried foods have 98% of their water removed. This significantly reduces the food's weight, making it easier to handle and less costly to transport. For example, 10kg of strawberries weigh only 1kg after freeze drying - one tenth of their original weight! They rapidly however can be rehydrated back to their original weight.

Long Shelf Life - Freeze dried foods can be stored for months or years at room temperature without deterioration or spoilage.

Low Storage Costs - Because it can be stored at room temperature, freeze dried food does not require costly cold or chilled storage facilities, making it much cheaper to store.

How do I prepare the meals?

Tins

There are 2 options:

Option 1 – Prepare an individual portion:

1. Mix can contents.
2. Remove specified portion of dry mix into a solid container.
3. Add hot water and stir the contents.
4. Cover food and allow to stand for 8-9 minutes.
5. Stir, season to taste and serve.

Option 2 – Prepare entire can:

1. Remove the 3 oxygen scavengers from the tin.
2. Add hot water and stir the contents thoroughly,
3. Replace the lid and allow to stand for 8-9 minutes.
4. Stir, season to taste and serve.
