“A Green Revolution
is the best
ECO Solution”

Foreword by Diplomatic Mission Supplies on Going Green

Diplomatic Mission Supplies are proud to support the GO Green Campaign. We are passionate about backing this and as a company we have made many changes in order to create a sustainable footprint. Some example of what we have done are:

- Reducing our paper consumption drastically and have opting to store our records electronically instead of printing
- When required, printing on 100% recycled paper
- Utilising recycling bins efficiently in the workplace so that 90% of Diplomatic Mission Supplies' waste is all recycled
- Biodegradable crockery products in the workplace, saving on the use of plastic cutlery
- 100% LED technology lighting within the workplace (we are now proud to offer our new Electrical Services Department)
- Setting energy saving settings on laptops and monitors to reduce the amount of electricity used
- Supporting the Cycle to Work Scheme within the workplace which means that the majority of our employee's cycle to work, thus cutting the use of cars
- Balancing clients orders safely and securely with a reduction of unnecessary packaging.

As a company, we fully support a sustainable way of life; our belief is "A Green Revolution is the best ECO Solution".

Benefits of Going Green

The pursuit of a greener environment has many advantages, and many Countries are taking a big step towards doing this. Here at Diplomatic Mission supplies we have a large range of products to help the world take a step in a greener direction. The main benefits that are achieved from going green are:

- Cost savings. This can be achieved by changing traditional light bulbs to new LED technology that reduces energy consumption. Diplomatic Mission Supplies are now excited to offer their own Electrical Services Department
- Cleaner air that helps reduce the chances of respiratory complications
- A better image and reputation that allows Posts to lead by example
- Reducing wastage that goes to landfill, which helps towards a sustainable way of life
- A Green revolution is the first footstep to creating a cleaner world and together we will achieve this

Range of Eco-friendly products from Diplomatic Mission Supplies

At Diplomatic Mission Supplies, we are keen to be a positive example when it comes to going green. As you will see from the list below, there are a wide range of products from different areas that can help our clients embrace going green:

Dyson Airblade hand dryer

Dyson Airblade Hand Dryer:-

The new Dyson Airblade hand dryer is the most advanced hand drying technology that guarantees to give the most hygienic results in under 10 seconds. These hand dryers are 75% less expensive to run than the typical hand dryers. It also emits 97% less pollution than paper towels with up to 79% less CO₂ emissions.

Bosch Fridge Freezer

Bosch Fridge Freezer:- With an A++ energy rating it is guaranteeing a low-cost energy efficient fridge freezer. The fridge has over 194 litres worth of storage capacity and the freezer come with 94 litres; large storage capacity at a lower cost to you and the environment.

LaserJet Printers

LaserJet Printers:- LaserJet printers turnover per minute is significantly higher and more efficient than standard inkjet printers.. Over time, toner costs for a laser printer are far less than inkjet printer cartridges. Likewise, Inkjet cartridges dry out quickly when not in frequent use, whereas the LaserJet toners have a better life span and do not dry out.

Energy Efficient Laptops

Energy Efficient Laptops:- Diplomatic Mission Supplies provide a wide variety of energy efficient laptops that are built to sustain power which gives off a better Eco footprint. With a battery life that lasts for hours, this is one of the best energy saving ways in which our clients can save on.

Portable Air Conditioners

Portable Air Conditioners:- Highly efficient with an A++ class energy rating which means it uses little energy as opposed to its alternative. Each of our Portable Air Conditioners use natural efficiency gas that emits zero greenhouse emissions.

Marco Water Boiler EcoBoiler T10

Marco Water Boiler EcoBoiler:- Our Eco boilers are perfect for a range of catering locations and we have a variety of capacities that these products are supplied in. The water boilers not only offer an excellent performance but also can help to reduce energy bills thanks to its intelligent and efficient technology.

Torpedo Recycling Bin

Torpedo recycling bin:- Available in one, two or three bins, these recycling bins allow for an easily descriptive way to recycle. The fascia has numerous options to suit your requirements such as: Cans, Plastic Bottles, Paper, Glass, General Waste and food waste.

LED Technology

LED Technology (AURORA TRIPLE):- At Diplomatic Mission Supplies, we have our own Electrical Services Department that offers the latest technology when it comes to LED lighting. The product shown is called the Aurora Triple and this is a unique range of fully adjustable recessed LED downlight, which offers an exceptional performance. A fully adjustable spring guarantees that aiming positions are well maintained. This range offers 50,000 hours of life.

(Please see our new Electrical Services Department PDF for further information)

Reusable Coffee Cups

Reusable Coffee Cups:-

Promoting sustainability and reducing wastage. The reusable coffee cups are ideal for an eco-friendly image. When the product comes to the end of its life span it can simply be recycled again. These coffee cups can be personalised with any writing or logos that may be required, for example, FCO crests and embassy names.

Biodegradable Disposable Wooden Cutlery

Biodegradable Disposable Wooden Cutlery:-

Our biodegradable cutlery is made from environmentally friendly birch and are able to be recycled after use, creating an alternative to plastic which isn't environmentally friendly. Supplied in packs of 100, these are perfect for events.

Green Compostable Hot Cups

Green Compostable Hot Cups:-

Our hot cups are perfect to improve a Post's green footprint and these feature a paper construction with a lining made from plant-based materials. The cups are fully compostable and a lot more sustainable as opposed to the conventional plastic lined alternatives. These cups will aid reduction in non-recyclable waste and provide post's with a greener image.

Biodegradable Paper Straws

Biodegradable paper straws:- Made entirely from sustainably sourced paper, these straws are completely biodegradable. After the worldwide campaign for paper straws, we are keen to support this and help reduce plastic waste in our seas and oceans.

Recycled Brown Paper Carrier Bags

Recycled Brown Paper Carrier Bags:- These bags are ideal for catering events and are made using high quality recycled paper. These bags are 100% recyclable and are supplied flat pack, which takes up little storage space, and are ready to be used within seconds.
